

TJM Europe LLP Best Execution Summary 1st January 2018 – 31st December 2018

Assessments

The Firm seeks to obtain the best possible execution result, taking into account the price, liquidity, cost, speed of execution, likelihood of execution and settlement, size and nature of the client's order and any other considerations relevant to the execution of the order, which it considers as execution factors.

The relative importance of the execution factors on each of the client's orders will be influenced by the nature of the order, the financial products the order relates to, the client's own priorities and the nature of the venue available for execution of the particular order.

The firm has no special arrangements concerning best execution in place with any venues and does not receive any remuneration, discount or non-monetary benefit for routing client orders to a particular trading venue or execution venue, which would infringe the requirements on conflicts of interest or inducements as set out in MiFID II.

The Firm only has professional clients to which it owes best execution and does not deal with retail clients as part of its business model.

Top 5 Execution Venues
